Portfolio: [akil0814.github.io](#)

SUMMARY

Computer Science student focused on C++ software engineering, developing modular apps and games using SDL, Qt, OpenGL, and SQLite. Familiar with modern C++ (C++11/17), CMake, and working in Linux environments (CLI workflows, vi, basic networking, firewall configuration, and port forwarding). Familiar with multiple design patterns and applying them to improve maintainability and extensibility. Interested in C++ backend development and graphics-oriented engineering.

TECHNICAL SKILLS

Programming Languages: C/C++/Python/SQL/ GLSH/HTML/CSS/ JavaScript

Graphics: OpenGL, GLFW, GLAD, SDL2/SDL3

Data: SQLite, cJSON

Tools: Git/GitHub, CMake, vcpkg, Visual Studio, MinGW, Windows/Linux

Concepts: OOP, scene/state management, data persistence, defensive programming, debugging

Languages: English(fluent), Chinese(native), Japanese(basic)

PROJECTS

WarShip (C++ / SDL) | [Overview](#)

- Reusable modules with separation of input, update, rendering, and game state.
- Improved maintainability with clearer ownership boundaries and patterns.

Minesweeper (C++) | [Overview](#)

- Mode selection, custom difficulty, timer, fast restart, and first-click safety logic.
- Scene manager for clean menu/settings/gameplay transitions and extensibility.
- Layered grid state + auto-expansion for empty cells.

College Tour App (Qt / SQLite) | [Overview](#)

- Qt Widgets + SQLite desktop app with DataManager layer to reduce UI-DB coupling.
- Connection checks, transactions, and query validation for reliability.

8-bit CPU / Digital Logic Build (74xx TTL) | [Overview](#)

- Breadboard CPU-style modules using 74-series logic chips (registers/adders/buffers).
- Designed a 16x8 memory architecture with dedicated address register and program counter for instruction sequencing.

Personal Portfolio Website ([GitHub Pages](#)) | [akil0814.github.io](#)

- Responsive portfolio with theming and interactive UI elements.
- GitHub Actions pipeline for stable generated assets.

EDUCATION

Saddleback College | Computer Science (in progress)

GPA: 3.9

Relevant Coursework: Data Structures, Physics (E&M), Linear Algebra, Calculus

Expected Graduation/Transfer: 9/2026

JOB EXPERIENCE

UPS Preload

September 2023 – August 2025

- Managed high-volume package sorting under strict time constraints in early-morning operations.
- Maintained accuracy and workflow efficiency in a fast-paced logistics environment.
- Collaborated with team members to ensure on-time dispatch and operational consistency.
- Successfully balanced full-time academic coursework with early-morning shift responsibilities.

Saddleback College – CARE Corner Assistant

October 2025 – Present

- Assisted students with resource coordination and administrative support.
- Communicated clearly with diverse student populations in a service-oriented setting.
- Contributed to an organized and supportive campus environment.
